Get DM Info Seen By The World

Attached is something I have put together months ago about how to get Donald Marshall (DM) information seen by the world. The attached file breaks down everything in a step-to-step method.

As you may have seen I've been making short videos ('shorts') and posting it on social media (SM). I used AI to make the shorts. All explained in the document. I would then post the shorts on the big SM platforms.

I'd like us to change the narrative, and shift this world and our collective experience towards a positive timeline. Too much negativity going on these days. A lot of negativities, which I know, can be avoided with our collective efforts.

I'm certain there are many, who are just as skilled, or even more skilled on their phones / devices than I, -and with their efforts, they too can get DM info to be seen by a wider audience, by following the methods attached in making short videos. So far, I've had 3 shorts get over 10K views on FB, and the most viewed has 82k views, so far on FB (shown in the document).

I also haven't posted every day, as the document suggests. Posting everyday was the suggestion I received from watching others who made their videos gain large views. I've posted whenever I've had time. Sometimes 3 new shorts a day, on a range of SM platforms. And sometimes, just 1 new short, with gaps in days.

I've posted whenever I've been able to. I also experimented with hashtags etc, just to have some idea of what works and what does not. What is evident is: posting short videos, with relevant hashtags, written descriptions, and a call to action, works.

I also did not even make the shorts as 'flashy' as I may be able to, with more time. I just want the word to get out, and focused on making the shorts, as well as I could, as fast as I could. The short videos still receive many thousands of views.

I am therefore confident: that others with their efforts, and the same blueprint behind their efforts, can also assist with informing the public and shifting the narrative to avoid much of the negative timeline we are currently witnessing.

Golden Truth 112

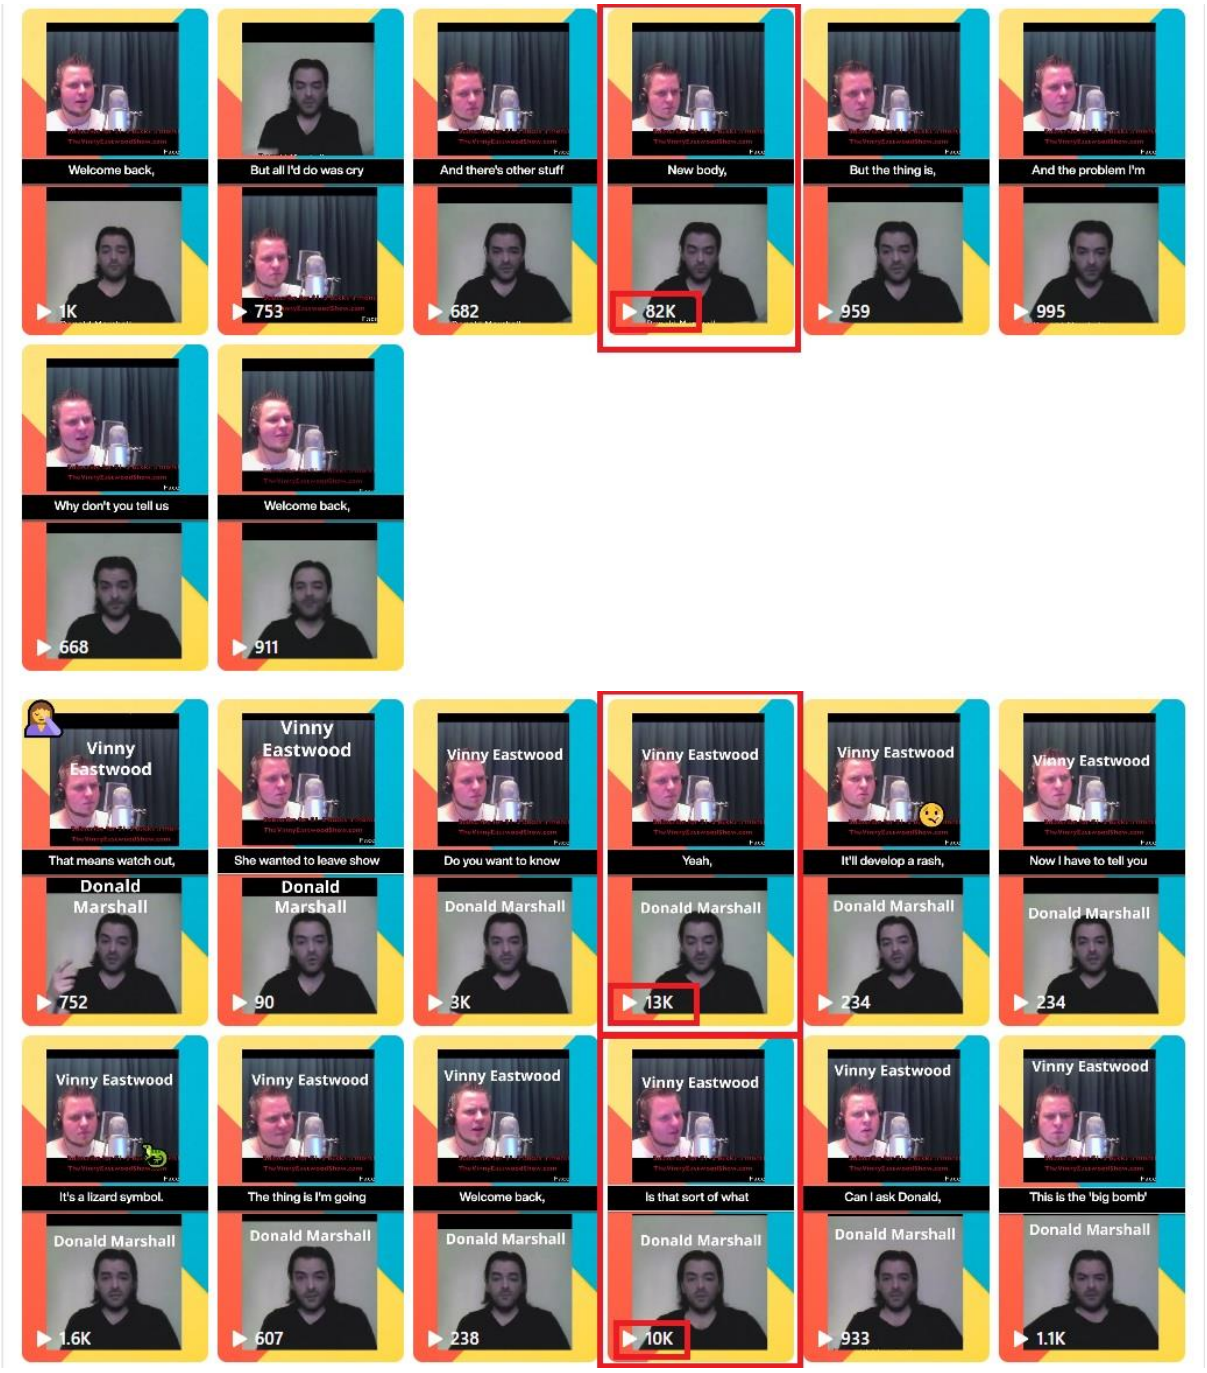
Team-work -detailed step-by-step

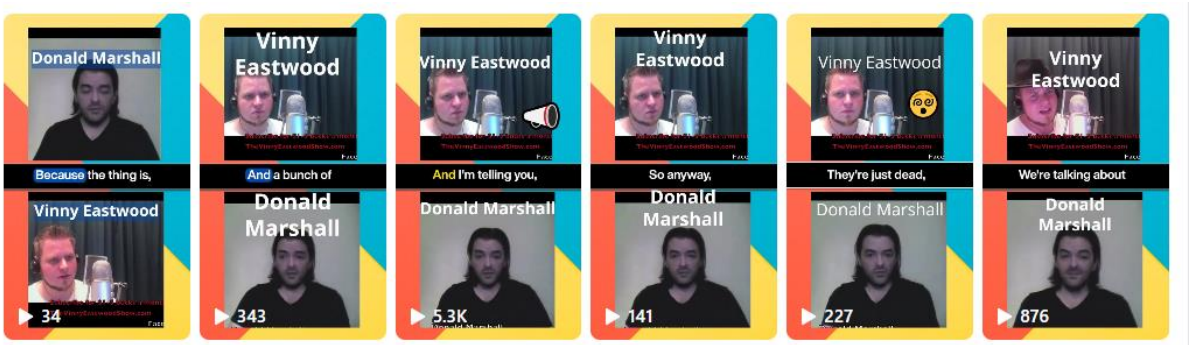
Ideas:

An idea to consider: Sending out DM info in Newsletter / emails. (put link to petition as standard)
Link to petition: https://www.thepetitionsite.com/en-gb/952/622/178/end-human-cloning.-rem-driven-human-cloning/

Results so far

Reels over 10K views are highlighted. The most viewed short has 82K views and over 1k likes to date.





AM (Mornings)

Create 5 different 15 second vids. Post on each account below. Include video descriptions with CTA.

TT 01
TT 02
TT 03
TT 04
TT 05

Create 1 new, 15 second vid. Post on each account below. Include video descriptions with CTA.

Vid must follow all guidelines of terms and conditions.

TT MTA
Twitter

Post on FB Page
Post in FB groups
YouTube video

Noon (Afternoons) 1-3 PM

Create 1 new, 15 second vid. Post on each account below. Include video descriptions with CTA.

Vid must follow all guidelines of terms and conditions.

(All TT accounts): - TT 01 – TT 05 and TT MTA
Twitter
Pinterest
YT Shorts
IG
FB Reel; Post on FB Page and Post in FB groups

PM (Evenings) 6 - 8 PM

Create 1 new, 15 second vid. Post on each account below. Include video descriptions with CTA.

Vid must follow all guidelines of terms and conditions.

(All TT accounts): - TT 01 – TT 05 and TT MTA

Twitter

Pinterest

YT Shorts

IG

FB Reel; Post on FB Page and Post in FB groups

**TT = tik tok; 5 tik tok, throw away accounts, where we can be a bit more adventurous.*

TT MTA = tik tok main account. (6 TT accounts).

YT = YouTube

IG = Instagram

FB = Facebook

CTA = Call to action.

The Plan

- Create 6 different Tik Tok accounts (and the other social media accounts listed).
- 5 of the 6 tik tok accounts are throw away accounts ('TT01 – TT 05'). We can be more adventurous.
- If TT 01 to TT 05 accounts get banned or scrapped for whatever reason, we will just start / replace the TT 01 to TT 05 account.
- 1 of 6 of the 6 Tik Tok accounts, is the main account (TT MTA). We have to stick entirely to the rules and regulations, and must not post any content, that will cause strikes or get banned. Must follow everything exactly.
- We must make, in total: -8 different, 15 seconds or less, videos per day.
- In the mornings we make 6 different videos, each a maximum of 15 seconds long. Videos 1 to 5 can be more adventurous, and we are not too concerned if it gets banned. It's the main account, TT MTA video, which must follow all the rules and regulations.
- In the afternoon, we make one new, 15 second (or less) video.
- In the evening, we make one new 15 second (or less) video.
- Each video must contain video descriptions, call to action, written in video description.

Video editing software:

Vidyo **:** **https://vidyo.ai/** (software capable of condensing long form video into short from, (15 secs).
InVideo: **https://invideo.io/** (text to video generator. Free version has watermark on vids.)
CapCut**:** **https://www.capcut.com/** (can be downloaded for windows);

If anyone knows of a free text to video image generator (software takes written text and it generates video images for the text.) then do let me know; -or the best free text to video image generator do let me know.

MUST WATCH VIDEOS!

The following videos demonstrate how easy it is to create videos with the following editing tools.

The tool is called Vidyo.ai. Transform long form content into short form! #ai

In the AM (Mornings)

- We must each post 6, short, 15 seconds long vids in the mornings.
- 5, 15 seconds vids are posted onto TT 01 – TT 05 accounts. We can be more adventurous and do not have to follow guidelines to a tee.
- Use appropriate hashtags which references each (of the different) 15 second videos.
- The 1 video posted in the AM on TT MTA (TT main account), -must follow all the guidelines, and must be a maximum of 15 seconds long.
- That one video we create and post on TT MTA, (which follows all the guidelines), -we then take that **SAME** video and post on:
    - Twitter
      Pinterest
      YT Shorts
      IG
      FB Reel
      Post on FB Page
      Post in FB groups
      YouTube video

- The one TT MTA video, made in the morning, which is the same video we post on: Twitter, Pinterest, YT shorts, IG, FB Reel, (our) FB page, FB group, and YouTube video -follows all the guidelines and is posted on the above platforms, -because those are accounts, we want to avoid getting banned, -and want to grow things more organically.

- Therefore, **the entire AM looks like**:
    - TT 01
    - TT 02
    - TT 03
    - TT 04
    - TT 05
    - TT MTA
    - Twitter
    - Pinterest
    - YT Shorts
    - IG
    - FB Reel
    - Post on FB Page
    - Post in FB groups
    - YouTube video

- creating 5 different, 15 second max videos that are posted, on TT 01 – TT 05 accounts.
- Then creating one 15 seconds max video, that follows all guidelines and goes on:
- TT MTA, Twitter, Pinterest, YT shorts, IG, FB Reel, (our) FB page, FB group, and YouTube video.
- After completing the above, the morning is done. Rinse and repeat the above, and do that consistently on a daily basis.

At Noon (Afternoons) -between 1-3 PM

- Create a new 15 second video, in the afternoon to post. Just one more video in the afternoon. This would be video **number 7** created for the day.
- Write one video description for the newly created video. Use appropriate hashtags which references the 15 second video.
- Use this same video description that you have and copy it to different platforms.
- This video we create in the afternoon, follows all the guidelines, such as the video we created for TT MTA.
- We then post this newly created 15 second video on all the accounts:
    - TT 01
    - TT 02
    - TT 03
    - TT 04
    - TT 05
    - TT MTA
    - Twitter
    - Pinterest
    - YT Shorts
    - IG
    - FB Reel
    - Post on FB Page
    - Post in FB groups
    - YouTube video

- After completing the above, the afternoon is completed. Rinse and repeat the above, and do that consistently on a daily basis.
- Repeat the above process every day.

In the PM (Evenings) 6 – 8 PM

- Create a new 15 second video, in the evening to post. Just one more video in the evening. This would be video **number 8** created for the day.
- Write a video description for the newly created video. Use appropriate hashtags which references the new 15 second video.
- Use this same video description that you have and copy it to different platforms.
- This video we create in the afternoon, follows all the guidelines, such as the video we created for TT MTA.
- We then post this newly created 15 second video on all the accounts:
    - TT 01
    - TT 02
    - TT 03
    - TT 04
    - TT 05
    - TT MTA
    - Twitter
    - Pinterest
    - YT Shorts
    - IG
    - FB Reel
    - Post on FB Page
    - Post in FB groups
    - YouTube video

- After completing the above, **the entire day is completed**. Well done. You have finished creating and posting 8 different, short, 15 second videos on various platforms referencing DM info. Rinse and repeat the above, and do that consistently on a daily basis.
- Repeat the above process every day.

Call to action:

I am open to suggestions here:
I think all our 15 second videos, although short, must contain a call to action.
I think the call to action should be two-fold: the first step should ask others to sign the petition:

Call to action 1 (sign petition):

And this can be done as the first call to action within the video (if possible) "Sign the petition"
In the description can be:
Do you want to see an end to human cloning? Sign the petition, or:
Show your support for the end of human cloning, sign petition (if this can be show in videos, great):

The petition:

End human cloning. REM driven human cloning petition:

https://www.thepetitionsite.com/en-gb/952/622/178/end-human-cloning.-rem-driven-human-cloning/

Call to action 2 (entice people to watch more videos from you):

This is where you can link your 1st 15 second TT video, to video 2, whereby video 2, links to video 3, and video 3, links to video 4, and video 5 links to video 6, and video 6 links to video 7, and finally video 7 links to video 8.

If, -in the video – you tell viewers to check the video description for more information, or if possible… in the 15 second video -you place your call to action on the video, such as:

- Do you want to learn more about REM cloning?
- Do you want to learn more about REM cloning mentioned in songs?
- Do you want to learn more about REM cloning mentioned in movies?
- Do you want to learn more about REM celebrities involved in cloning?

- The above examples could be: the first, 15 second video talks about DM related info, referencing: REM cloning; -the call to action then asks at the end: 'Do you want to learn more about REM cloning?' -Check the description below:

- Then 15 second video 2: discusses something like a REM clone is grown from a blood sample, and it takes 5 months. At the end of video two you, could have something like: Do you want to learn more about REM cloning mentioned in songs? Link in description.

- Then in 15 second video 3, as an example: you could have in the song 'Break the Ice' Britney spears goes to a cloning factory. Her fantasy is to blow up a cloning station? -and so on…

I think by having some sort of call to action, short, and informative videos -it will engage people. The team work aspect will build the views over time. And those who do learn more about CC (cloning centres) can sign and pass on the petition to others.

Monetization (of videos / content):

We are a watch culture. It is harder to really influence people in society today with written text on social media, as we can with videos. It is videos which must be made to influence others.

- Monetization is something I openly want to discuss with you two.
- Personally, I'd rather, DM info about: - cloning, Vril, consciousness transfer, underground aliens and everything else he exposes, becomes common knowledge around the world, than monetize and have problems down the line.
- I am not opposed to the monetization of videos and content. I understand monetization (of video content) can be an incentive to get others on board for our cause. However, when other influencers that were promoted, gained notoriety, monetization caused and created problems at some future point.

- When DM info gets ridiculously big – it would not be surprising -that there are 'corrective' measures put in place, which then makes things more difficult for the everyday person, who remains uniformed about DM related type content.
- The wisdom from others is: -we should **not** monetize any of our videos, when our objective is to gain recognition and promote a cause.
- Let big tech keep their money. This way they do not mess with our accounts (as much).

Further notes

- We must have 6 different TT (tik tok) accounts: -because if we for whatever reason, we happen to show a print screen on TT, which the platform does not like, the whole account may get a ban. TT is not so great about this. However, the positive of TT is that it gets many views.
- With Tik Tok accounts TT 01 to TT 05: -be more adventurous, with these scrap accounts. If our scrap accounts get banned, do not worry about them. Scrap them and start another scrap TT account.
- TT MTA (Main TT account (and other big platforms)): -stick to the main guidelines for TT. Follow all guidelines and regulations. Grow main TT and other platforms slowly over time. Be very particular about which videos that you put on your main accounts.

Key points: - Lessons on how to get noticed from social media

Social Media Recognition: Key lessons 1

- The reach of some social media influencers is not organic.
- Big social media influencers have teams, and 1000s of people, each posting 7 videos each, of the social media influencer's content every day, for months and months on end.
- That's a total of 7000 videos a day of one social media influencer (conservative figures).
- Some social media influencers have an affiliate monetisation system for content creators that post videos of the social media influencer's content. Affiliate commissions (and monetization) is an incentive for the teams of 1000+ individuals of big social media influencers, who post the content of the social media influencer. However, monetisation of content can cause further problems down the line – such as: getting banned, suspensions, shadow bans, and outright account deletions etc. -for promoting content which is in opposition to mainstream narratives.
- Nevertheless, when for 4-5 videos go viral, about a certain point of discussion, -this really shifts the consciousness of the world.
- Therefore, this is a feature of the social media algorithm, --supporters of Donald Marshall can utilize as a method to get Donald Marshall related content noticed in the world.

Social Media Recognition: Key lessons 2

- There are currently some social media influencers with over 500 million views (half a billion views) on Tik Tok so far.
- These social media influencers with 100s of millions of views on Tik Tok so far do not have 1000+ teams posting their video content. Rather, some of these social media influencers who have 100s of millions of views (in total) have around a team of 50 people that post their social media videos daily.
- For some social media influencers, a team of 50 people have been able to gain the social media influencers 500 million plus views on Tik Tok alone.

- Some social media influencers, despite having 100s of millions of views, do not monetize their content on any platform. They have a zero-monetization policy. They do not monetize on: Tik Tok, Instagram etc. -zero monetization across all platforms.
- What is the reason some of these social media influencers, -that gain 100s of millions of views for their video content, do not monetize on any platform? Because they want recognition over money.
- Some of these social media influencers, refer to the fact they do not monetize their content on any platform as: 'protection money'.
- They let big tech keep their money in return that big tech does not mess with their accounts.
- Allegedly, the money big tech receives through viewership, should offer some form of protection (from having accounts messed with). The wisdom from some social media influencers with 100s of millions of views -is to let big tech keep their money and do **not** monetize.

Objectives

- The main objective is to make DM related info more accessible and reach more people; have the information be known to widely across world; and the negatives of secret technologies used for nefarious purposes against unsuspecting victims, brought to an end.
- A 90-day challenge. 3 months. 3 months of posting 8, short, 15 second videos a day.
- As a current team of 3, can try to achieve a goal of posting 8, short, 15 second videos, every day for 90 days, and note the outcome(s) of such a task.
- If a team of 50 people achieves 500 million views, then with the 3 of us, we must aim for 30 million views on DM related info between us.
- If 50 people achieve 500 million views, we should aim to get more people on board following this blueprint, where they are also posting 8 videos per day on various platforms, to increase viewership to DM related info.
- A 50 strong, trustworthy DM team, where each person posts, 8 videos per day, is a good benchmark for us to eventually realise.
- Do we reach 30 million views or more in 90 days collectively as a team? If not, how long must we keep going before we reach the 30 million views, posting 8, short, 15 seconds content a day? (*This is something to think about*).

90 Day Team Challenge

- Post 8, short, 15 second videos a day on multiple platforms, for 90 days. Use descriptions and call to actions (CTA), in video or video description. Use hashtags.

Breaks

- After posting every single day, for 90 days, a break is well deserved.
- During our break, we reflect on our efforts and our accomplishments over the 90 days.
- How long should our break be? Too short, and I personally, don't recover; -too long and I find it difficult to get back into work mode. So, 9 days max? 90 days work, 9 days rest (where we take a break from posting videos every day)?
- Or after 90 days… do we decide, wow -this is going so well, lets continue for another 30 days, and then take a break?

Reviews

- We have to periodically review our progress.
- I think a review after every 7 days of work, would be useful in terms of monitoring our progress, advantages gained, and disadvantages to avoid.
- As a team, we can discuss: the pros and cons of what worked, and did not work, -of the previous 7 days.
- We can capitalize on what worked very well in the last 7 days, and avoid whatever mistakes were made in the pervious 7 days.

30, 60, 90 reviews

- Monthly team reviews will also be advantageous, as we can set a pace and a direction for objectives we wish to achieve in the next month.
